• https://my-resume-nextjs-mu.vercel.app/

Innovative software developer who loves learning new technologies and mastering software engineering. I am committed to utilizing my skills to further the company's mission. I believe that success only comes from working hand in hand with my team and I believe in solving community issues through technology.

WORK EXPERIENCE

TRT GLOBAL   **istanbul - Türkiye**
full-stack develop   February 2024 – October 2024

- Comprehensive content management system: Develop a robust content management system (CMS) for your content management system, ensuring that all content adheres to predefined guidelines before publishing. The system included spell-checking, content validation, and push email notifications.
- AI Integration: Leveraged Artificial Intelligence to assist writers with formatting, translation, text summarization, and content enhancement, significantly improving the efficiency and quality of content creation.
- Collaboration with NewsHQ and AssetHQ: Worked with NewsHQ and AssetHQ to integrate additional features, improving overall system capabilities and user experience.
- Microservices Architecture: Adopted a microservices architecture to divide the project into smaller, manageable services, facilitating easier development, maintenance, and scalability.
- Technologies Used: [Node.js, React, MongoDB, Postgresql, Docker, AWS, Typesense, nextjs, PayloadCMS. Python]

Hitatek   **hacettepe teknokent, Ankara**
Team Lead Software Developer   February *2022 - November 202*3

- Developed a Telegram bot using Node.js to track project progress, manage invoices, and handle permissions, enhancing project management efficiency by 25%.
- Developed software for Baykar, starting with the **Eğitim Yönetim Sistemi** (Education Management System), which handles semesters, curriculum, trainers, trainees, exam schedules, and more, including notifications.
- Developed the **Saha Yönetim Sistemi** (Field Management System) for Baykar, an ERP system for managing company resources, branches, field resources, employee tracking, priority organization, and fair employee evaluation.
- Built election tracking pages for TRT World, featuring real-time data from Anadolu Agency, improving data accessibility during elections.
- Technologies Used: [Node.js, React, MongoDB, ubuntu server, nestjs, C#, .net core, Redis, MSSQL, NestJs, AWS, Docker, cloudflare. Python, Angular]

Tarım Kredi Teknoloji A.Ş   **Gazi Teknopark, Ankara**
Software Developer (Trainee)   February *2022 – April 202*2

- Developing a wholesale platform to buy from wholesalers directly to consumers
- Creating Tappy Chicken with Unreal Engine
- Technologies Used: [C#, C++, .net core, Blazor webassembly, Angular, MongoDB, ubuntu server, MSSQL, cloudflare]

Freelancer   **Keçiören, Ankara**
Software Developer   2018 - 2022

- Developed an appointment booking app for barbers using Kotlin, featuring in-app payments, ratings, photo uploads, and comments, increasing user engagement by 40%.
- Built an e-shopping app with Visual Studio and .NET Core Blazor, integrating ERP functionality to provide a mobile-friendly platform, boosting sales by 20%.
- Optimized finance resource utilization using "Ubuntu Remmina" and Raspberry Pi, enabling simultaneous access to a central computer for basic applications, reducing hardware costs by 30%.
- Contributing to the development of ustaol.com, a platform that offers fresh food ingredients with ready-to-cook recipes, providing a variety of meal options. It is similar to Blue Apron
- Technologies Used: [C#, C++, .net core, Blazor webassembly, Angular, MongoDB, ubuntu server, MSSQL, cloudflare]

EDUCATION

Sakarya University   **Sakarya, Turkey**
Bachelor of Science in Computer Engineering   2018 – 2022

ADDITIONAL INFORMATION

Certifications / Honors: Data Structures, Algorithms, Software Engineering, Access Code in Networking

Skills: Data Structures, Analysis of Algorithms, Docker, Angular.io, Typesense, NextJS, Nest.js, JAVA, JAVA Spring, ReactJS, JavaScript (JS), TypeScript (TS), Node.js, Redis, Ubuntu-Server, C/C++, Kotlin, Android Studio, MongoDB, MongoDB Atlas, .NET Core, Blazor, EF Core, SQL (MSSQL, PostgreSQL, SQLite), Office 365, draw.io, Git, GitHub, GitLab, PayloadCMS, aws elasticsearch Atlassian (Trello, Jira) AWS, Cloudflare, Python, VueJS, Photoshop, Figma, PHP, Laravel, Design Patterns, Software Architecture, Performance Optimization, Troubleshooting and Solutions Deployment, Love of Learning, Dedicated Team Player, Analytical Thinking Skills, Attention to Detail, Enhanced with Strong Verbal Communication, Time Management
Interests: I am interested in the latest technology and self-development. Interested in Rust and IOT I love swimming and sports. I like to listen, I'm a fairly good listener. I love learning and I love the thrill of learning, especially in the field of programming. I love camping trips and cruises.

Language: Arabic (Native), Turkish (Proficient), English (Pre-Intermediate)
